Data checks & interpretation

Checks on the full source dataset, independent of active filters

Unique invoices	1,000 / 1,000
Missing source values	0
Raw vs. cleaned common fields	Exact match
Price × quantity = cogs	Pass
cogs + tax = invoice total	Pass
Tax = reported gross income	All 1,000 rows

The source ends on **30 March 2019**. March is not a complete calendar month. Period totals should not be treated as like-for-like growth comparisons.

Profit definition needs verification. The source reports gross income of **15,379.37**, exactly equal to the 5% tax field. The implied margin is uniformly 4.76% of invoice totals. This dashboard does not treat that field as verified operating or net profit; no operating expenses are provided.
